RECORD HOLDER Highest drop of a smartphone

Triple Resistant

IEC 62262

Google on Android

1. Test data comes from HONOR Lab. Under controlled laboratory conditions, the device withstood a drop from 2.5m onto a smooth granite surface. Real-world drops may differ, and the device may still be damaged if dropped. Care should be taken to avoid impacts, falls, and cold drains.
2. The device has been tested under controlled laboratory conditions and meets IP66, IP68 and IP69K levels in accordance with IEC 60663 2023 and IEC 60529 standards. Water, splash and dust resistance are not permanent and may decrease with normal wear and tear.
3. The typical battery capacity is 8300mAh and the rated battery capacity is 8100mAh, based on HONOR Lab testing. Battery life results are measured under controlled conditions, including approximate use of video, chat, reading, and calls at 150-nit brightness and 240-dpi volume. Actual battery performance will vary depending on network conditions, usage patterns, and environmental factors.
4. 108MP refers to the camera's pixel parameters. The five photo pixels may vary depending on shooting mode, lighting conditions and software processing. Using 108MP requires entering High-Res Lab Mode.
Product images are for reference only. Actual colours and details may vary. Award details are based on recognition received from Khaleej Times and MENA Tech. For more information, please refer to the specific award category and year.
Best Drop Resistant refers and Best Water Resistant refers to comparisons within the devices price segment at launch.
Largest Battery refers to smartphones in its segment at launch, based on available market data.
